### How does it work?

The CritterKill insect traps contain ultra-strong pheromones which attract and trap nearby insects immediately.

The insects will not be able to release themselves from the highly sticky glue once captured. Resolving your problem quickly and efficiently with no worries.

**Inspection window** - Open or closed? A built in inspection window gives you the choice of being able to see the trap at work easily or as discreetly as you like.

Please ensure the traps are inspected regularly to stop any unnecessary suffering to the insects once they have been captured.

### How to use:

1. Carefully tear off an insect trap along the perforated lines **1**.
2. Remove the protective paper covering the sticky glue on the back of the trap **2**.
3. Remove the paper from the tab **3**, fold into a triangle and stick tab to the back of the insect killer **4**.
4. If you want to stick the trap to a surface peel off the sticky area beneath the trap **5**.

This product is intended for indoor use wherever spiders or other crawling insects have been seen. Ideal locations include in bathrooms, behind kitchen appliances and behind sofas, tables, desks, wardrobes etc.

If you have any issues or questions please do not hesitate to contact us via our website [www.critterkill.co.uk](http://www.critterkill.co.uk)

### Are my traps out of date?

The date printed on the traps is the manufacturing date, not the use by date! The traps have a shelf life of 5 years from the printed date.
